PROFILE

Experienced JavaScript Developer with 5+ years building robust web applications across both in-house and freelance projects. Strong proficiency in React JS and Node JS, delivering high-quality user experiences through optimized designs and data systems. Proven ability to lead and mentor junior developers while ensuring project success.

WORK EXPERIENCE

Globant – ITAU, Grupo Vazquez   Oct 2022

React Developer - Buenos Aires, Argentina

- As a solo dev led the front-end development of a full-fledged banking investment analysis platform, with graphs, search filters and authentication. Serving over 1,200 employees.
- Prevented a project delay by coding a reverse proxy server on Node/ExpressJS, which enabled uninterrupted development and feature releases, saving an estimated 3 weeks of downtime.
- Implemented a complex "dual-control" feature after a team lead's departure. Delivered it on time, meeting client expectations and safeguarding the project timeline.

Tools/Technologies: ReactJS, Vite, Typescript, Azure B2C Auth, TailwindCSS, ChartJS, Tanstack Table, Tanstack Query, NodeJS, ExpressJS, Zod, ShadCN UI, Docker, Github CI.

E-Buyplace   Jan 2022 - Oct 2022

React Developer - Buenos Aires, Argentina

- Worked on the development of a SRM platform using modern frameworks and libraries. Migrating and improving features from a legacy version of the app.
- Led a small front-end development team, providing guidance and establishing standard best practices.
- Communicated with other teams and senior management to adapt our main business web application to changing industry standards.

Tools/Technologies: ReactJS, NextJS, Typescript, Tanstack Table, Redux, Formik, NextAuth.js, Material UI.

Labormex   Feb 2020 - Jan 2022

FullStack Developer - Buenos Aires, Argentina

- Actively contributed to the development and maintenance of an internal web-app designed for managing business transactions.
- Played a key role in every phase of the development lifecycle, from concept to deployment.
- Bridged technical communication gaps between teams and ensured seamless collaboration across language barriers.

Tools/Technologies: ReactJS, Typescript, NodeJS, ExpressJS, Styled-Components, React Hook Form, Gitlab CI.
